

## Explore the available equipment at the MakerStudio in **Whitestown**

### 3D Printers (4)

*Bambu Lab P1S with AMS*

Create three-dimensional objects from digital designs using layered printing technology.

### ScanNCut Paper and Vinyl Cutter

*Brother SDX330D*

Cut paper, vinyl, and other compatible materials for crafts, labels, decals, and more.

### Portable Diode Laser

*xTool F1 2W IR + 10W Diode Laser*

A compact laser engraver designed for quick, precise engraving on a variety of small items and materials.

### Desktop CO<sub>2</sub> Laser

*xTool P2 55W CO<sub>2</sub> Laser*

A high-powered laser cutter and engraver capable of working with larger materials and a wider range of surfaces, including wood, acrylic, and more.

### Embroidery Machine (3)

*Brother NQ1700E*

Add names, monograms, and designs to fabric items such as towels, shirts, and pillows. Largest embroidery area: 6" x 10".

### Sewing Machine

*Janome 3160 QOV*

Beginner-friendly sewing machines for basic sewing, mending, and fabric projects.

### CoverStitch Machine

*Brother CV3550*

A sewing machine designed for professional-quality hems, stretch stitching, and finishing edges on garments.

### Serger

*White Speedylock Differential 1600*

A serger sewing machine designed to trim, stitch, and finish fabric edges in one step. The differential feed helps create smooth seams on stretchy or lightweight fabrics and can also be used for decorative gathering effects.

### Sublimation Printer

*Sawgrass SG500*

Print sublimation designs for transfer onto polyester fabrics and specially coated items such as mugs, metal, ceramic, and more.

### Heat Press

*16" x 20" Auto-Opening Clamshell Heat Press*

Use heat and pressure to transfer designs onto fabric and other compatible surfaces.

### Hat Press

*Cricut 3*

A specialized heat press designed to apply heat-transfer designs to hats and curved surfaces.

### Mug Press

*HTVRont Tumbler Press*

Apply permanent heat-transfer designs to mugs and other compatible drinkware blanks.

### Button Maker

*American Button Machines 2.25" and 1.5"*

Create custom buttons using your own designs—great for events, art, or personal projects.

### Thermal Laminator

*Scotch TL901X*

A thermal laminating machine used to protect and preserve documents, signs, artwork, and other printed materials by sealing them inside clear laminate pouches.

### iMac

*24-inch iMac with Retina 4.5K Display*

Includes access to Canva Premium, Embrilliance Embroidery Design Software, xTool Studio, Bambu Studio, Brother Canvas Workspace, Cricut Design Space, and more.

### Boone Power Recording Studio

The Boone Recording Studio is available for audio recording, podcasting, and music production.
